

Resume Parsing with Document Upload

Apply resume data to the online application with the myStaffingPro® Resume Parsing with Document Upload module.

Features

- ▼ **Enhanced Applicant Experience** – Increase the usability of your online application process by allowing applicants to upload their documents and parse their resume information.
- ▼ **Provides an Application “Shortcut”** – Provide applicants with a simple way to apply their education and employment history from their resume to the application builder. Once parsed, the applicant can quickly review the information and complete the online process.
- ▼ **Add Applicant via Resume** – Effortlessly add an applicant into myStaffingPro by uploading a resume and parsing its information to create a file.
- ▼ **Search for Resumes by Keyword** – Run keyword searches the on text version of the uploaded resume. The keyword search can be utilized to pinpoint candidates with a desired skill set, title, or previous employer.
- ▼ **Flexibility to Edit Resumes** – Utilize over fifteen available formatting tools to review and modify the applicant’s text resume.
- ▼ **Accommodating File Extensions** – Upload documents in an assortment of file extensions including: doc, pdf, rtf, txt, and wpd.

Please contact your Sales Representative for additional functionality and pricing information.
